WORKSHOP FORMAT FOR CHAPTER MANAGERS

Operational AI Excellence

for Chapter Managers

Two hours · your laptop · your own questions

Community format by a YPO member · not official YPO material

AMBIDEXTRIE CONSULTING

THE WALL · 3 QUESTIONS FROM CHAPTER MANAGERS

Which one burns most today?

1 · REACH

How do I reach my members — email and WhatsApp?

2 · KNOW

How do I build a knowledge base, with automation where possible?

3 · PERSIST

How do I survive the yearly change of officers without losing what we know?

We start with **KNOW**: one assistant, built once, used 3 times.

WHO IS SPEAKING

I have sat on the other side of your desk.

Past chair. Regional officer.

And I still don’t know your job
as well as you do.

THE ONE IDEA

Chairs and officers rotate every year. The Chapter Manager stays.

AI helps you become — and keep — the memory of the chapter, without more hours. That is the bet.

AMBIDEXTRIE CONSULTING

Know. Reach. Persist. And a few simple rules.

1	Opening & foundation
2	**KNOW · Lab A**
☕	Coffee break
3	**REACH · Lab B**
4	**PERSIST · Chairs rotate**
5	Show & close

FOUNDATION

Paid plan, chapter accounts, desktop app.

Paid plan, training off

A business plan is ideal. On a personal plan, switch training off before you start.

Chapter accounts + one folder

You and your Chair: accounts in the chapter's Microsoft 365 or Google Workspace.

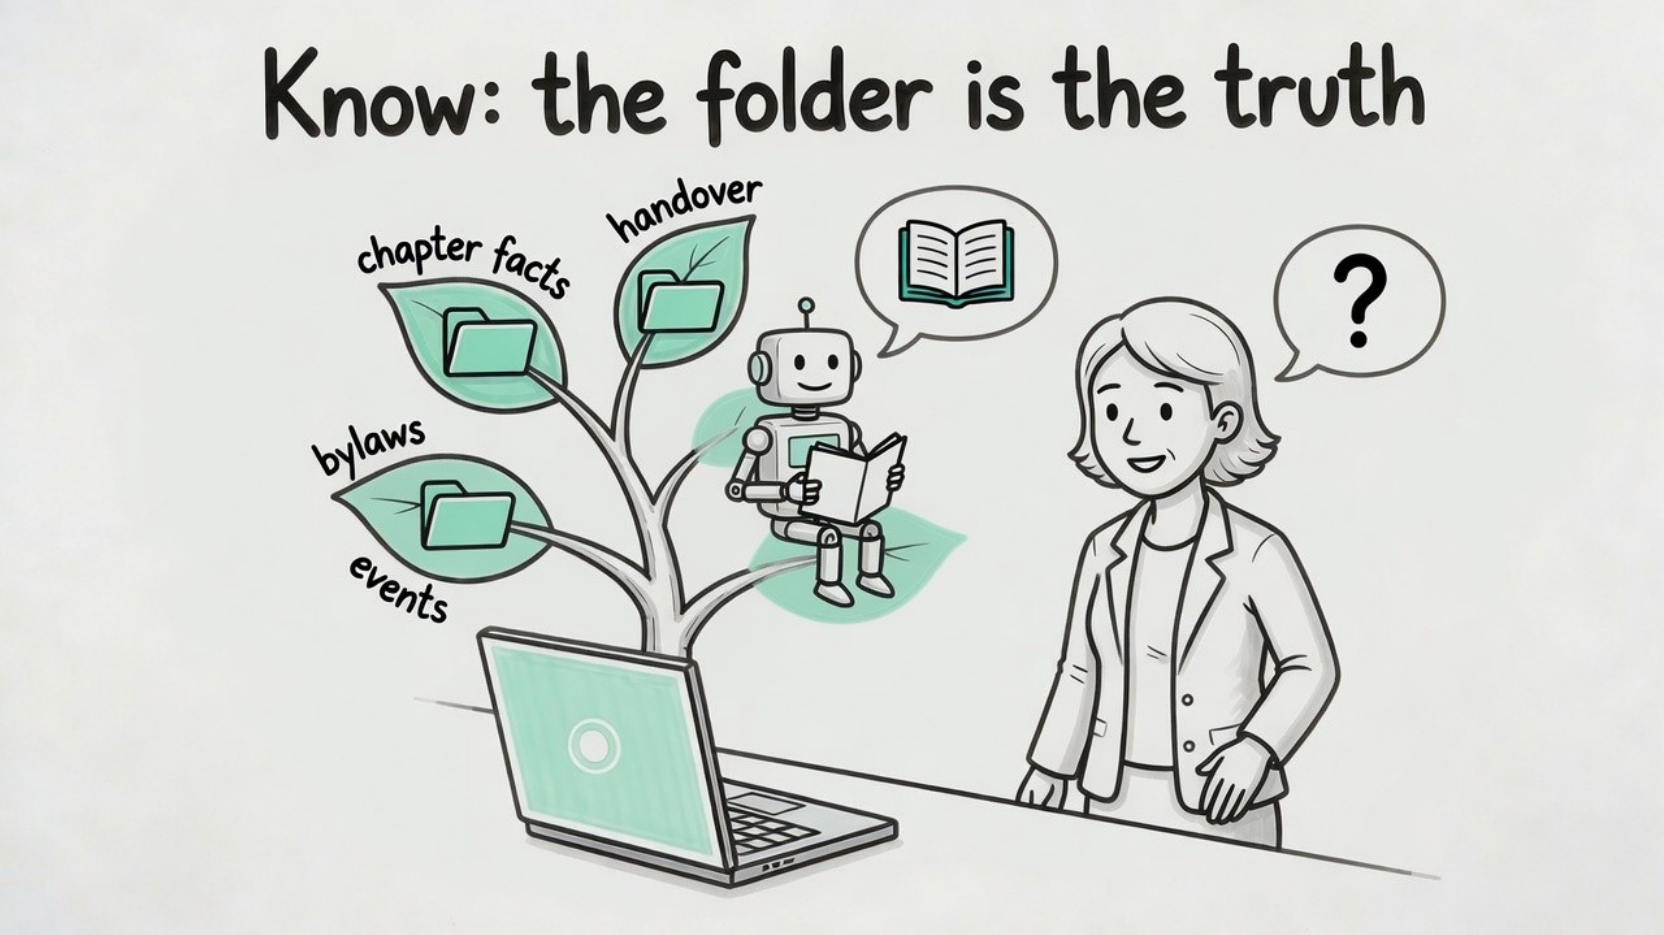

Today: the desktop app

ChatGPT or Claude — one folder, and the assistant saves every file itself.

KNOW · QUESTION 2

Your own files are the truth.

The assistant reads before it answers — or says UNCHECKED.

AMBIDEXTRIE CONSULTING

LAB A · 20 MINUTES

Build your assistant.

STEP 1

4 min

Create CM-Workspace. Unzip _kit.zip into it. Open it in the desktop app. Paste the core as your first message.

STEP 2

5 min

Prompt 1: build and see your chapter folder.

STEP 3

8 min

Prompt 2: 6 short answers. It saves **chapter-facts.md** in 02-chapter-knowledge/.

Unknown = [verify].

STEP 4

3 min

Prompt 3: your yearly question — read, quote, check. Look in the folder.

The core: _kit/02-your-assistant/cm-assistant-instructions.md, below the line.

Stop when the time is up. Who is ahead helps a neighbour. The full interview is tonight's homework.

Mail in, filed, draft. You read it. You send it.

Email for what is binding. WhatsApp for what is short. One channel to you.

REACH · WHATSAPP

Export today. Your own app later — built by your AI.

TODAY · STAGE 1

Export chat

WhatsApp’s own export, without media → summary → one-to-one drafts. No setup.

LATER · STAGE 2

Your own small app

Your AI tool builds it on your laptop from the build guide. It reads the chats you choose and drafts replies.

Your number stays yours. AI reads and drafts, you send — one message at a time.

Forum groups and any chat with Forum content — mixed chats too — are never exported.

LAB B · 12 MINUTES

1 email, the new way.

1. Paste the practice block from
   _kit/02-your-assistant/lab-b-practice-pack.md

2. Then type:
   Save all three now.

3. Open the folder:
   mail, log line, draft — saved.

4. Read the draft.
   Do not send.

PROMPT

New email below, followed by our rules.

1) Say which folder it belongs in and give a file name (YYYY-MM-DD_sender-role_topic.md).

2) Give me one log line for 00-handover/log.md.

3) Draft a reply in my voice; answer only from the rules below and cite the section; mark every fact without a source as [verify]. I send it myself.

[the fictional mail — from the practice pack]

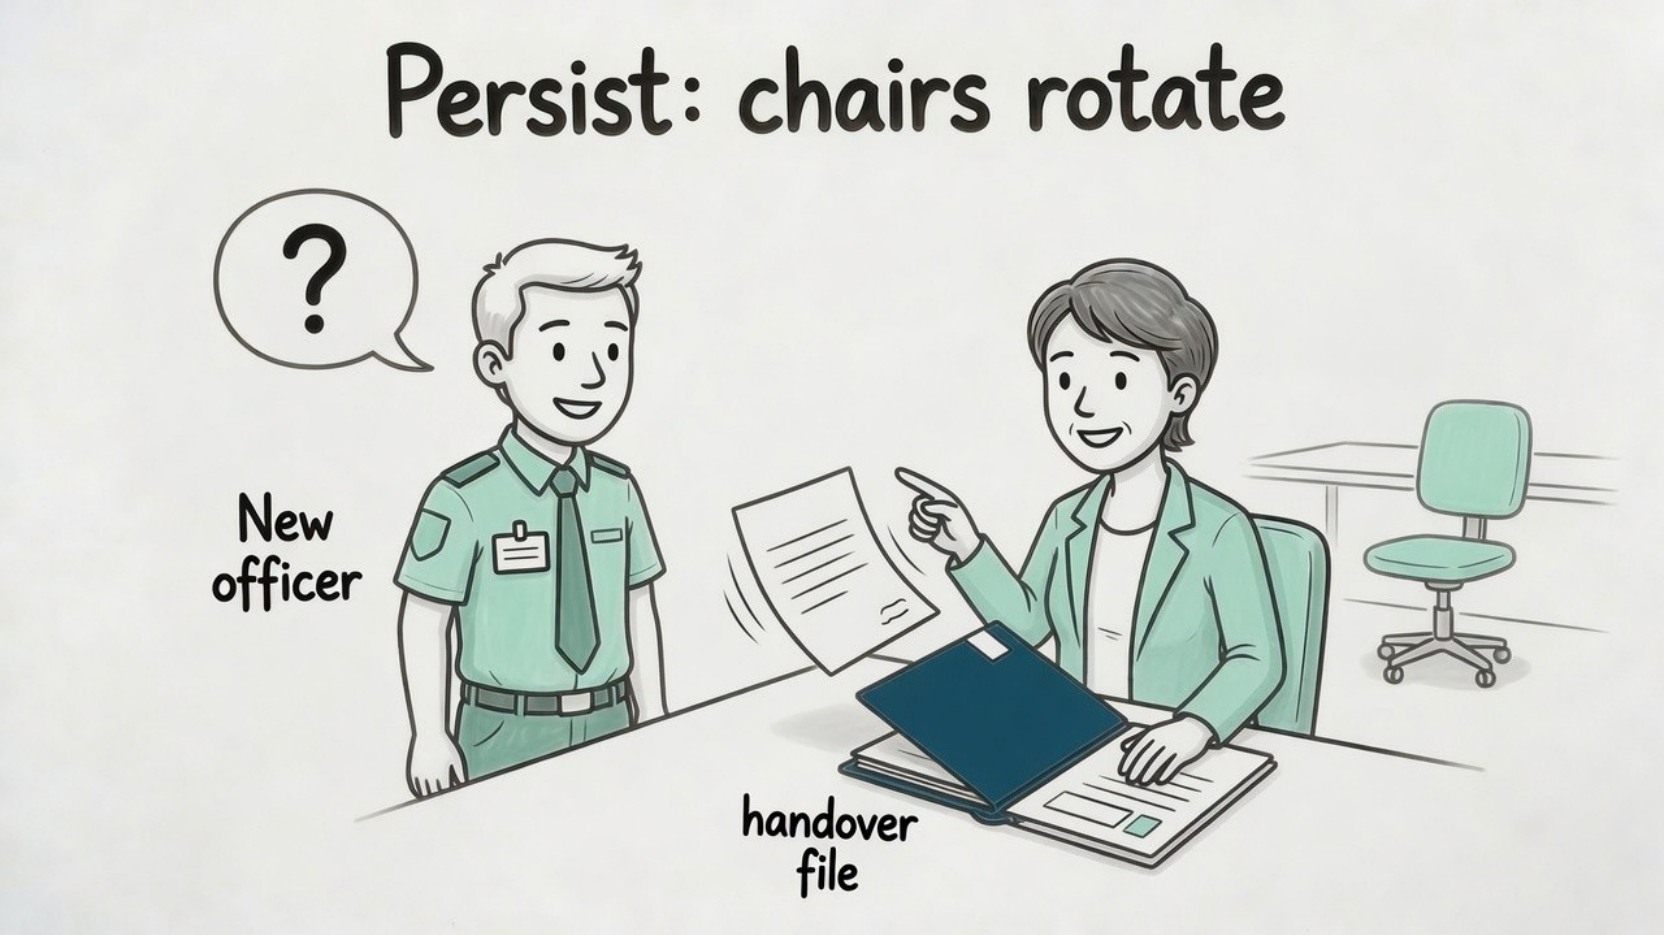

[sections 4.1 and 4.2 — from the practice pack]

Stop when the time is up. Your own mails come tonight — Forum content stays out of the chat.

PERSIST · QUESTION 3

A new officer asks. The folder answers.

Officers change every year. You are the continuity — when your system is the chapter's.

AMBIDEXTRIE CONSULTING

PERSIST · WHAT STAYS YOURS

Your method and your number. The chapter keeps its folder.

You work for your chapter — self-employed or employed by it. Your know-how goes with you.

YOURS

Know-how · your templates and prompts · your method · your WhatsApp number · your AI account

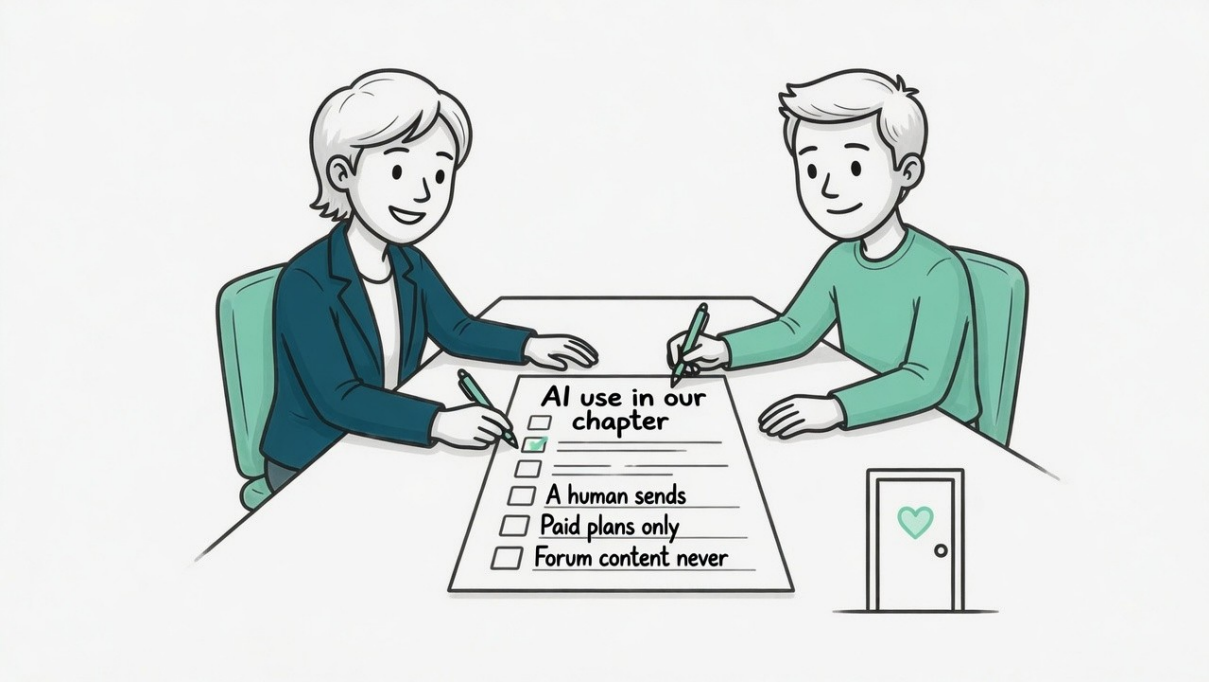

THE CHAPTER'S

Data · decisions · event files · role accounts · the handover note and the log

The test: Would the next Chapter Manager need it to run this chapter? Chapter folder. Would you use it with any chapter or client? Yours.

AMBIDEXTRIE CONSULTING

AI use in our chapter.

1. **Forum logistics yes. Forum content never.** A name next to a topic is content.
2. Paid plans only, training off — ideally a business plan.
3. A human sends.
4. Role accounts — at least manager@ and chair@ — and one chapter folder.
5. Our own files are the truth.

Chair and Chapter Manager propose. The ExCo decides. Access ends when the role ends.

AMBIDEXTRIE CONSULTING

5 rules. They cost no money — they ask for discipline.

1	**One channel**	All requests via the Chair or 1 named person. The Chapter Manager receives one prioritised list.
2	**Lead time**	Officer updates and material arrive 1 week before they are needed.
3	**Response target**	24 hours or a date — the ExCo does the same when the Chapter Manager asks for a decision.
4	**Fixed dates**	ExCo dates and deadlines are not moved at short notice. Event work is budgeted separately from the Chapter Manager's base agreement.
5	**Briefing before taking office**	Every new officer gets a briefing from the Chapter Manager and our AI house rules before they start.

Proposed by the Chair. Decided by the ExCo. Reviewed each year at the officer handover.

AMBIDEXTRIE CONSULTING

LAB C · 4 MIN, THEN CHAIRS ROTATE · 6 MIN

It’s 1 July. You are the new Learning Officer.

FIRST · LAB C · 4 MINUTES · PASTE INTO YOUR DESKTOP TASK — IT SAVES THE FILE

Checkpoint now. Refresh 00-handover/handover.md: what is set up, open items (each with what “done” looks like), paths touched. Then stop.

1 Switch · 1 min

A stays with the laptop. B takes their own laptop and moves 1 chair along.

2 B asks · 2½ min

A starts a new task with CM-Workspace and sends the restart prompt with B’s 2 questions.

3 Swap · 2½ min

A asks B the same 2 questions — on B’s laptop.

No file says it? UNCHECKED — that is homework, not a failure.

AMBIDEXTRIE CONSULTING

1 **What is open right now, and what does done look like?**

2 **Who do I ask for the venue contract?**

OUTLOOK · WHERE YOUR HOURS GO

Your log tells you. Your assistant keeps it.

Member communication, events, region and global, administration — in your own words.

DAY ONE · ONE LINE

After each task your assistant suggests one hours line. Only minutes you confirm count.

YOUR AREAS

About ten, in your words. Event hours from your comms logs count too.

LATER · YOUR OWN APP

Your AI builds it from the build guide: a timer per area and a month report. Runs in your browser, no install.

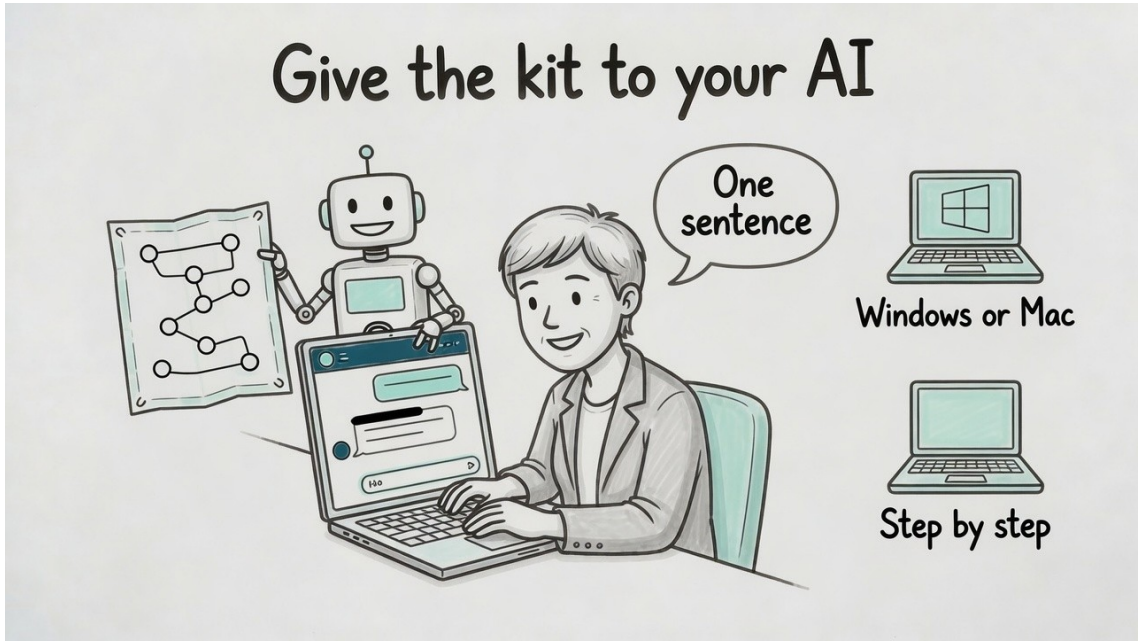

Your numbers, your folder. You decide what you show your Chair — for planning and for a talk about priorities and scope. Nothing goes anywhere by itself.

GET STARTED

Give the kit to your AI.

PASTE INTO A NEW CHAT IN YOUR PAID AI TOOL

Read https://raw.githubusercontent.com/kirchbergcapital/ypo-chapter-manager-best-practice/main/AI-GUIDE.md and guide me step by step.

1 · Everyone

Best in the desktop app, one folder open.

2 · Your AI can’t open links

Attach KIT-START.txt to a new chat and say: “This is my kit. Read the AI guide section first and guide me step by step.”

3 · The whole kit in your folder

Unzip _kit.zip in CM-Workspace, open the folder, say: “Read _kit/AI-GUIDE.md and guide me.”

Scan: the kit always the latest

No GitHub account. No plugin. No connector.

AMBIDEXTRIE CONSULTING

About 3 hours for your basic set-up.

20 min	Paid plan (business ideal), training off
15 min	Check laptop, accounts, desktop app
15 min	manager@ + chair@ + one storage
15 min	Create the folders
15 min	Desktop project + house rules
30 min	Interview → chapter-facts.md
20 min	First real email: filed, log line, draft
15 min	Commitments calendar
15 min	One-pager to your chair

The bet: the hours come from searching and answering twice. Test it with your own week — your log will tell you.

AMBIDEXTRIE CONSULTING

FEEDBACK · 3 QUESTIONS · ANONYMOUS

1 **What will you use next week?**

2 **What got in your way today?**

3 **What would make your chapter easier to work for?**

Nothing gets approved today. Every “that won’t work for us” on the wall is how v0.2 gets written.
